Software Requirement Specification (SRS)

Online Library Management System

Introduction

This document contains intentionally good and ambiguous requirements so that ReqGuard AI can detect them.

Functional Requirements

1. The user shall register using a valid email address.
2. The user shall log in using an email and password.
3. The system should respond quickly after the user logs in.
4. The admin shall manage user accounts.
5. The software should be user-friendly.
6. Passwords shall contain at least 8 characters.
7. The application should load fast even during peak hours.
8. The system shall allow users to search books by title, author, or ISBN.
9. The database should be efficient while processing search requests.
10. The system shall generate monthly borrowing reports.

Non-Functional Requirements

11. The application shall support up to 1000 concurrent users.
12. The backup process should complete within 5 minutes.
13. The interface should be simple for first-time users.
14. The system shall encrypt passwords using SHA-256 or stronger algorithms.
15. The application should provide adequate security.

Expected Ambiguous Words

quickly, fast, user-friendly, efficient, simple, adequate
